

A true dual-purpose hop with stone fruit and fig characters that has excellent bittering qualities.

Applications

New World styles of ales and lagers where brush fruity character and big but well constructed bitterness is desired. Readily toned back to lighter styles, even with multiple kettle additions and great when used in a combination of very late and dry hopping.

Breeding

Rakau™ is a triploid developed by New Zealand Plant & Food Research purpose bred and selected for its unique dual purpose brewing qualities and characteristics. Re-released from the NZ Hop breeding programme in 2007 for trials under organics and now widely established under conventional cultivation.

Brewing

Great results over several brewhouse applications have been seen with sensory panels scoring uniformly high on the quality of bitterness as well as unique fruity flavours and aromas.

Tech Specs

Alpha Acids	9-12%
Beta Acids	3-6%
Total Oil	0.8-2 mL/100g
B-Pinene	0.3-0.7%
Myrcene	45-55%
Linalool	0.4-0.8%
